Discussing the role of plasma proteins in current biotechnology, *Biotechnology of Plasma Proteins* describes the protein composition of human plasma, the fractionation of plasma to obtain therapeutic proteins, and the analysis of these products. It delineates the path from plasma products to recombinant products, and highlights products from albumin, intravenous immunoglobins, and coagulation.

discusses using human blood plasma as a starting material for manufacturing therapeutic products.

Biotechnology of plasma proteins. - Free Online Library

The fractionation of human blood plasma can be considered to be a mature industry, with the basic technology, alcohol fractionation, dating back at least to the 1940s. Many of the products described in the current work have been approved biologics since the 1950s. The information gathered from the..

[EPUB] Proteins Protein Science

The analysis of the 1-D electrophoregrams of the blood plasma revealed that the protein spectrum includes proteins (8 to 10 of protein bands) with a molecular weight (MW) of 13 to 160 kDa. In the group of patients with complicated diabetes mellitus type II lack or greatly reduced concentration of 2 proteins with MW of 130 and 100 kDa was found.
