Cardiac Arrest

Symptoms & Survival Rate

Overview. Sudden cardiac arrest is the abrupt loss of heart function, breathing and consciousness. The condition usually results from a problem with your heart's electrical system, which disrupts your heart's pumping action and stops blood flow to your body.

arrest. If not treated within minutes, it typically leads to death.. The most common cause of cardiac arrest is coronary artery ...

Cardiac arrest - Wikipedia

Cardiac arrest is the sudden loss of cardiac function, when the heart abruptly stops beating. A person whose heart

Acces PDF Cardiac Arrest

has stopped will lose consciousness and stop normal breathing, and their pulse and blood pressure will be absent.

Unless resuscitative efforts are begun immediately, cardiac arrest leads to death within a few minutes. This is often referred to by doctors as "sudden death" or "sudden cardiac death (SCD)."
