China, Russia and white supremacy top DHS' first public ...

In fact, so advanced and persistent has the Chinese cyber threat become, says FBI Director Christopher Wray, that China should now be viewed as the "most severe counterintelligence threat" to the United States. While Russia has meddled in past elections and Iran has been linked to cyber threats against critical infrastructure, China has been brazenly stealing U.S. intellectual property and using all of this stolen IP to bolster China's economic power.

Chinese Cyber Threat Now Represents a Major Threat to ...

This article, the first in a short series, provides insights from MWR's research, threat intelligence and investigations on cyber statecraft, beginning with Russia. Are we at (cyber) war? And does it matter? At MWR, we believe the concept of cyber war limits understanding of cybersecurity risk, and reduces our ability to respond effectively.

Latvian intelligence names Russia and China as biggest threats to EU and NATO. Latvia's most important intelligence service, the Constitution Protection Bureau (SAB), named China and Russia as the main cyber threats to NATO and the European Union. SAB's 2019 report focused mostly on the threat from the Russian Federation. According to the report, Russia funds think-tanks and "pseudo-academic organisations" to counter the legitimacy of Latvia's and other Baltic countries' statehoods.

Russia was said to pose one of the "greatest cyber threats to the United States during the next year," along with China, Iran and North Korea. Russia was expected to "conduct bolder and more disruptive cyber operations during the next year, most likely using new capabilities against Ukraine." The list of countries posing the "greatest espionage and cyber attack threats" has been cut to only China and Russia.

Worldwide Threat Assessment on Russia: 2019 vs 2018 ...

WASHINGTON (AP) — Cyberattacks from Russia, China, North Korea and Iran are increasingly sophisticated and, until recently, were done with little concern for the consequences, the top Pentagon cyber leaders told a congressional committee on Wednesday. Army Gen. Paul Nakasone, head of U.S. Cyber Command, laid out the escalating threats, following a Navy review released this week that described significant breaches of naval systems and concluded that the service is losing the cyber war.

US warns of sophisticated cyberattacks from Russia, China

Mike Beck, global head of threat analysis at cyber group Darktrace, says Russia's cyber policy has switched, from information gathering to offensives and disrupting important industries.
