 EDM - Electrical Discharge Machining is a way of cutting metal using electricity. Similar to a plasma cutter except under water. The process is very common in manufacturing of injection molds. The process can be as simple as using a small diameter metal tube to cut a precise hole in a metal block to using a carved graphite block to machine a toy shape in a metal block for injection molding.

EDM - Electrical Discharge Machining : 8 Steps (with ...  
 The Engine Data Management 700 system is the most advanced and accurate piston engine-monitoring instrument on the market. Using the latest microprocessor technology, the EDM will monitor up to twenty-four critical parameters in your engine, four times a second. Learn more about the EDM700 below
