The European Standard EN 13501-1:
Reaction to fire provides a number of
performance criteria to measure the fire
characteristics of building products. These
cover spread of flame and contribution to
fire as well the generation of smoke and
the production of burning droplets. The
table below provides an overview of the
available classifications.

European fire classification of construction products and ...

During its development, the European Commission's Fire Regulators Group wanted the system to directly address the hazards in an actual fire scenario — a fire in a room. To do this, they used a room corner test (ISO 9705-1: 2016 - Room corner test for wall and ceiling lining products) as the reference point.

What is the Euroclass System | Insulation | Kingspan ...

Fire resistance is classified through the European Standard BS EN 13501-2. Both built-up systems containing insulation board and insulated panel systems with high-fire resistance properties can help to contain the fire through two key elements:
