A V8 engine is an eight-cylinder piston engine in which the cylinders share a common crankshaft and are arranged in a V configuration. The first known working V8 engine was produced by the French company Antoinette in 1904 for use in aircraft, and the 1914-1935 Cadillac L-Head engine is considered the first automotive V8 engine to be produced in significant quantities. The popularity of V8 engines in cars was greatly increased following the 1932 introduction of the Ford Flathead V8.

V8 engine - Wikipedia

The Ford flathead V8 (often called simply the Ford flathead, flathead Ford, or flatty when the context is implicit, such as in hot-rodding) is a V8 engine with a flat cylinder head designed by the Ford Motor Company and built by Ford and various licensees. During the engine's first decade of production, when overhead-valve engines were used by only a small minority of makes, it was usually ...

has become famous worldwide.

The History and Development of the V8 Engine

The Ford flathead V8 is still heralded today as one of the first pioneers in 'hot rod' engines. Darracq were the first automobile company to put a V8 engine into the speed-records book. A relatively advanced design for 1906, the Darracq had pushrod overhead valves, 25 litres capacity and 200 hp output.

Many people mistakenly believe that the Ford flathead V-8 was the first V-8 engine. It proved to be extremely popular until the overhead valve engines arrived and was the first V-8 readily available to the masses, but it was not the first. Léon Levavasseur took out the first patent for a V-8 gasoline engine in 1902.
