The second volume of a three-book updated edition covering the whole range of Internet, CD-ROM and

dial-up online services, this text focuses on business, law and patents. Across the three volumes, experts from the UK and US describe in detail how to identify and exploit specialist bibliographic and non-bibliographic databases, the best search methods and delivery modes, and the relative merits of different services and online hosts in their different disciplines.

Against a backdrop of inadequate funding, misplaced priorities and a lack of manpower, American commercial aviation in the 1960s was in a perilous state. In July 1967, when a Piedmont Airlines Boeing 727 collided with a Cessna 310 over Hendersonville, North Carolina, killing 82 people, the industry was in crisis. Congress called hearings on aviation safety and government and union officials pressured President Lyndon Johnson to request increased funding for aviation safety. But the National Transportation Safety Board's probe into the crash was flawed from the start. The investigative team was made up of individuals whose companies had certain interests in the outcome. The lead investigator was the brother of the vice president of Piedmont Airlines. In an effort to shift blame from the government and Piedmont, critical conversations recorded on tape never made it into the NTSB's report. Maintenance and training

records, as well as industry warnings of the 727's operational limitations, were also omitted. This book reveals the true story of the investigation: what was left out and why.

Describing Prescriptivism provides a topical and thought-provoking analysis of linguistic prescriptivism in British and American English, from a historical as well as present-day perspective. Focusing on usage guides and usage problems, the book takes a three-fold approach to present an in-depth analysis of the topic, featuring: a detailed study of the advice provided in usage guides over the years; an authoritative comparison of this advice with actual usage as recorded in British and American corpora, including the HUGE (Hyper Usage Guide of English) database - developed specifically to enable this line of study - as well as more mainstream corpora such as COCA, COHA and the BNC; a close analysis of the attitudes to particular usage problems among the general public, based on surveys distributed online through the "Bridging the Unbridgeable" research project's blog.\* With extensive case studies to illustrate and support claims throughout, this comprehensive study is key reading for students and researchers of prescriptivism, the history of English and sociolinguistics. \*Found at <https://bridgingtheunbridgeable.com/>
