Use your peak flow diary - Asthma UK

A peak flow chart monitors an asthmatic condition by tracking the maximum flow (i.e., the peak rate) at which the patient can blow into a peak flow meter. The meter will record how hard and how fast the patient can exhale in a single go after deep inhalation. This peak flow number is recorded on a tracking chart.

A peak flow diary allows you to chart your asthma symptoms and peak flow readings. Your GP or asthma nurse will be able to provide you with a diary. It is helpful to take your peak flow diary to your asthma reviews to let your doctor or nurse see how stable your asthma has been.

Peak flow diary | My Lungs My Life

Peak flow monitoring is recommended for the ongoing management of asthma and during exacerbations. It is less used these days for the initial diagnosis of asthma, clinicians being encouraged to use more accurate measurements of lung function such as spirometry and the fractional exhaled nitrous oxide (FeNO) test. However, it still has a part to play if diagnostic uncertainty remains after ...
