emotional behavior in a practical, scientific, and culturally appropriate manner. It is divided into two major sections. Part I includes eight chapters that provide a general foundation for assessment practice. These chapters include coverage of basic professional and ethical issues, classification and diagnostic problems, and six primary assessment methods, which are presented in detail. Part II includes six chapters on applications for assessing specific social-emotional behavior domains, including internalizing and externalizing problems, social skills and peer relations, young children, and diverse cultural groups. Together, these two sections provide a framework for a model of assessment that is practical, flexible, sensitive to specific needs, and empirically sound. Changes in the second edition of this book include: increased coverage of the practice of functional behavior assessment; updated test reviews; reviews of new assessment instruments; updated information on legal and ethical issues; updated information on assessment and cultural diversity; and a handy appendix with contact information for all publishers of instruments discussed in the book, including Web site addresses. To the greatest extent possible, this book weaves together the most recent research evidence and common application issues. It is specifically relevant to practitioners and researchers in the fields of school psychology and child clinical psychology, but will also be of interest to those in related disciplines, such as counseling, social work, child psychiatry, and special education.

Generally recognized as the standard work in its field, *Behavioral, Social, and Emotional Assessment of Children and Adolescents* is a comprehensive guide for conducting conceptually sound, culturally responsive, and ecologically oriented assessments of students' social and emotional behavior. Written for graduate students, practitioners, and researchers in the fields of school psychology, child clinical psychology, and special education, it will also be of interest to those in related disciplines. Building on the previous editions, this fifth edition includes updated references to DSM-5 and federal standards as well as an integrated approach to culturally competent assessment throughout the text. In Part I, *Foundations and Methods of Assessment*, the author provides a general foundation for assessment practice and outlines basic professional and ethical issues, cultural considerations, and classification and diagnostic problems. Part II, *Assessment of Specific Problems, Competencies, and Populations*, includes material on assessing specific social-emotional behavior domains, including externalizing problems, internalizing problems, social skills and social-emotional strengths, and the unique needs of young children. A chapter on school-wide screening methods was also added with this edition. By weaving together the most recent research evidence and common application issues in a scholarly yet practical matter, *Behavioral, Social, and Emotional Assessment of Children and Adolescents* continues to be the pre-eminent foundation for assessment courses.

Since it was founded in 1920, the Tavistock Clinic has developed a wide range of psychotherapeutic approaches to community mental-health which have always been strongly influenced by psychoanalysis. In the last thirty years it has also developed systemic family therapy as a new theoretical model and clinical approach to family problems. The Clinic has become the largest training institution in Britain for work of this kind, providing post-graduate and qualifying courses in social work, psychology, psychiatry, child, adolescent and adult psychotherapy and, latterly, in nursing. It trains about 1200 students each year in over 45 courses.

*The Handbook of Clinical Interviewing with Children* is one of three interrelated handbooks on the topic of interviewing for specific populations. It presents a combination of theory and practice plus concern with diagnostic entities for readers who work, or one day will work, with children (and their parents and teachers) in clinical settings. The volume begins with general issues (structured versus unstructured interview strategies, developmental issues when working with children, writing up the intake interview, etc.), moves to a section on major disorders with special relevance for child populations (conduct disorders, attention-deficit hyperactivity disorder, learning disorders, etc.), and concludes with a section addressing special populations.

Generally recognized as the standard work in its field, Behavioral, Social, and Emotional Assessment of Children and Adolescents provides a comprehensive foundation and guide for conducting conceptually sound, culturally responsive, and ecologically-oriented assessments of student social and emotional behavior. It is aimed at graduate students, practitioners, and researchers in the fields of school psychology, child clinical psychology, and special education, but will also be of interest to those in related disciplines such as counseling psychology, child psychiatry, and social work. Keeping intact many of the same premises and pedagogy of the previous editions, this revised and updated fourth edition has been re-organized to emphasize culturally responsive reflective practice, with added content including updated assessment tools and strategies to be used within a Response to Intervention (RtI) framework. In addition to updating all chapters to reflect current research and data, authors Sara Whitcomb and Kenneth Merrell move away from a more narrow view of social skills to reflect an expanded notion of strengths-based assessment, which includes such traits as coping skills, resilience, problem-solving ability, emotional knowledge, and empathy. Throughout, they strive to increase professional standards in the practice of psychological and educational assessment of children and adolescents, providing a solid, evidence-based foundation for assessment.

Rumors about sightings of an alien space ship create excitement when Arthur's friends come to spend the night.
