

Serial EEPROM Cross Reference Guide

Thank you very much for downloading serial eeprom cross reference guide. As you may know, people have look hundreds times for their chosen books like this serial eeprom cross reference guide, but end up in infectious downloads. Rather than reading a good book with a cup of tea in the afternoon, instead they are facing with some harmful virus inside their laptop.

serial eeprom cross reference guide is available in our book collection an online access to it is set as public so you can get it instantly. Our digital library hosts in multiple countries, allowing you to get the most less latency time to download any of our books like this one. Kindly say, the serial eeprom cross reference guide is universally compatible with any devices to read

Serial EEPROM Cross Reference Guide
Access PDF Serial EEPROM Cross Reference Guide The Microchip Technology Inc. 24LC04B is a 4Kb I2C compatible Serial EEPROM. The device is organized as two blocks of 256 x 8-bit memory with a 2-wire serial interface. Low-voltage design permits operation down to 2.5V, with standby and active currents of only 1 µA and 1 mA, respectively.

Serial EEPROM Cross Reference Guide
Summary. The Microchip Technology Inc. 24AA128/24LC128/ 24FC128 (24XX128*) is a 16K x 8 (128 Kbit) Serial Electrically Erasable PROM (EEPROM), capable of operation across a broad voltage range (1.7V to 5.5V). It has been developed for advanced, low-power applications such as personal communications or data acquisition.

24LC128 - Memory
The above Cross Reference Search is designed to be used as a guide for basic product information and for reference only. It is not intended to provide comprehensive product specifications and/or feature comparisons.

Macronix - Cross Reference Search
The Microchip Technology Inc. 25AA640/25LC640 (25XX640*) is a 64 Kbit Serial Electrically Erasable PROM [EEPROM]. The memory is accessed via a simple Serial Peripheral Interface (SPI) compatible serial bus. The bus signals required are a clock input (SCK) plus separate data in (SI) and data out (SO) lines. Access to the device is controlled through a Chip Select (CS) input.

25C640 - Memory
EPROM Cross Reference Guide. 1996 Microchip Technology Inc. DS11178D-page 1. Microchip provides a wide selection of EPROM devices, both from a density and a packaging standpoint. If you are interested in a part that is not listed in this book, please refer to the Microchip data book, or contact your local distributor or sales representative for assistance.

EPROM Cross Reference Guide
General Guidelines: 1. The "93" designator in the EEPROM part numbers specifies a 3-wire serial interface. 2. The "06" designator in the EEPROM part numbers specifies a 256-bit device. 3. The "46" designator in the EEPROM part numbers specifies a 1K device. 4.
