Problem : A 10 kg object experiences a horizontal force which causes it to accelerate at 5 m/s², moving it a distance of 20 m, horizontally. How much work is done by the force? The magnitude of the force is given by $F = ma = (10)(5) = 50$ N. It acts over a distance of 20 m, in the same direction as the displacement of the object, implying that the total work done by the force is given by $W = Fx$...
