Techniques of Grief Therapy: Assessment and Intervention continues where the acclaimed Techniques of Grief Therapy: Creative Practices for Counseling the Bereaved left off, offering a whole new set of innovative approaches to grief therapy to address the needs of the bereaved. This new volume includes a variety of specific and practical therapeutic techniques, each conveyed in concrete detail and anchored in an illustrative case study. Techniques of Grief Therapy: Assessment and Intervention also features an entire new section on assessment of various challenges in coping with loss, with inclusion of the actual scales and scoring keys to facilitate their use by practitioners and researchers. Providing both an orientation to bereavement work and an indispensable toolkit for counseling survivors of losses of many kinds, this book belongs on the shelf of both experienced clinicians and those just beginning to delve into the field of grief therapy.

New Techniques of Grief Therapy: Bereavement and Beyond expands on the mission of the previous two Techniques books, featuring innovative approaches to address the needs of those whose lives have been shadowed by loss—whether through bereavement, serious illness, the rupture of a relationship, or other complex or intangible losses, such as of an identity-defining career. The book starts with several framing chapters by prominent theorists that provide a big-picture orientation to grief work and follows with a generous toolkit of creative therapeutic techniques described in concrete detail and anchored in illustrative case studies to convey their use in actual practice. New Techniques of Grief Therapy is an indispensable resource for professionals working in hospice, hospital, palliative care, and elder care settings; clinicians in broader health-care and mental health-care practices;

executive coaches; and students in the field of grief therapy.

Die Behandlung einer Anorexie stellt eine besondere Herausforderung für Therapeuten dar. Die Betroffenen haben eine starke Bindung an ihre Symptomatik und ein ausgeprägtes Autonomiestreben, oft verbunden mit einer fehlenden Krankheitseinsicht. Dies erschwert den therapeutischen Zugang. Hinzu kommen die mit dem Untergewicht verbundenen gravierenden gesundheitlichen Folgen. Das in diesem Band vorgestellte manualisierte psychodynamische Vorgehen wurde zur ambulanten Behandlung der Anorexia nervosa bei erwachsenen Patientinnen entwickelt. Die Wirksamkeit des beschriebenen Therapiekonzepts konnte in einer umfangreichen empirischen Studie belegt werden. Einleitend gibt der Band grundlegende Informationen zum Störungsbild der Anorexia nervosa und erläutert relevante Störungsmodelle und -theorien. Weiterhin werden Hinweise zum diagnostischen Vorgehen gegeben. Anschließend werden die Therapieprinzipien und Behandlungsphasen vorgestellt und praxisnah anhand von Interventionsbeispielen erläutert. Der Behandlungsfokus liegt besonders auf beziehungs-dynamischen Aspekten und damit verbundenen zentralen Konfliktthemen. Einen weiteren therapeutischen Fokus stellen typische ich-strukturelle Beeinträchtigungen dar, z.B. in den Bereichen des Affekterlebens und der Affektdifferenzierung, der Impulssteuerung, Selbstwertregulierung und der Wahrnehmung des eigenen Körperbildes. Zwei ausführlichere Fallbeispiele runden den Band ab.

Techniques of Grief Therapy: Assessment and Intervention also features an entire new section on assessment of various challenges in coping with loss, with inclusion of the actual scales and scoring keys to facilitate their use by practitioners and researchers. Providing both an orientation to bereavement work and an indispensable toolkit for counseling survivors of losses of many kinds, this book belongs on the shelf of both experienced clinicians and those just beginning to delve into the field of grief therapy.

With clarity and eloquence, Trauma and Grief Assessment and Intervention comprehensively captures the nuance and complexity involved in counseling bereaved and traumatically bereaved persons in all stages of the life cycle. Integrating the various models of grief with the authors' strengths-based framework of grief and loss, chapters combine the latest research in evidence-based practice with expertise derived from years of psychotherapy with grieving individuals. The book walks readers through the main theories of grief counseling, from rapport building to assessment to intervention. Each chapter concludes with lengthy case scenarios that closely resemble actual counseling sessions to help readers apply their understanding of the chapter's content. In the support material on the book's website, instructors will find a sample syllabus, PowerPoint slides, and lists of resources that can be

used as student assignments or to enhance classroom learning. Trauma and Grief Assessment and Intervention equips students with the knowledge and skills they need to work effectively with clients experiencing trauma and loss.

This core introductory text, with a focus on clinical application, combines the knowledge and skills of counseling psychology with current theory and research in grief and bereavement. The third edition is updated to address issues related to the developmental aspects of grief, including grief in children and young people, grief as a lifespan concept, and grief in an increasingly aging demographic. It describes new therapeutic approaches and examines the neurological basis of grief as well as trauma from disruption and loss. Also emphasized is the role of diversity, along with cultural considerations in grief counseling. Instructor 's resources include a Test Bank, Instructor 's Manual, and PowerPoint slides. User-friendly, while grounded in the latest research and theoretical constructs, the text offers such pedagogical aids as learning objectives, practice examples, glossary terms, and questions for reflection in each chapter. Above all, the book addresses grief counseling and support in a way that is informed and practical. The content explores concepts relevant to complicated grief, while differentiating the normal human experience of grief from mental disorders. Purchase includes digital access for use on mobile devices and computers. NEW TO THE THIRD EDITION: Updated research and content on attachment and grieving styles Expansion of social issues impacting grief including political changes, environmental concerns, cultural differences, and exposure to terrorism New theory, research, and practice for grief in non-death losses New information on diversity and grief, the role of grounding and contemplative

practices, and grief and developmental perspectives across the lifespan Use of technology in both professional and informal grief support New case studies with additional case scenarios for real-world application Practice examples containing clinical application information in each chapter KEY FEATURES: Focuses on clinical application Combines the knowledge and skills of counseling psychology with current theory and research in grief and bereavement Written in easy-to-understand language, with emphasis on practical application Includes learning objectives, practice examples, glossary terms, and questions for reflection Supplemental Instructor ' s Manual, Test Bank, and PowerPoints included

Non-Death Loss and Grief offers an inclusive perspective on loss and grief, exploring recent research, clinical applications, and current thinking on non-death losses and the unique features of the grieving process that accompany them. The book places an overarching focus on the losses that we encounter in everyday life, and the role of these loss experiences in shaping us as we continue living. A main emphasis is the importance of having words to accurately express these ' living losses ' , such as loss of communication with a loved one due to disease or trauma, which are often not acknowledged for the depth of their impact. Chapters showcase a wide range of contributions from international leaders in the field and explore individual perspectives on loss as well as experiences that are more interpersonal and sociopolitical in nature. Illustrated by case studies and clinical examples throughout, this is a highly relevant text for clinicians looking to enhance their support of those living with ongoing loss and grief.

Attachment-Informed Grief Therapy bridges the fields of attachment studies and thanatology, uniting theory, research, and practice to enrich our understanding of how and why people grieve and how we can help the bereaved. In its pages, clinicians and students will gain a new understanding of the etiology of complicated grief and its treatment and will become better equipped to formulate accurate and specific case conceptualization and treatment plans. The authors also illustrate the ways in which the therapeutic relationship is a crucially important—though largely unrecognized—element in grief therapy, and offer guidelines for an attachment informed view of the therapeutic relationship that can serve as the foundation of all grief therapy.

This book provides detailed analysis of the manifold ways in which COVID-19 has influenced death, dying and bereavement. Through three parts: Reconsidering Death and Grief in Covid-19; Institutional Care and Covid-19; and the Impact of COVID-19 in Context, the book explores COVID-19 as a reminder of our own and our communities' fragile existence, but also the driving force for discovering new ways of meaning-making, performing rites and rituals, and conceptualising death, grief and life. Contributors include scholars, researchers, policymakers and practitioners, accumulating in a multi-disciplinary, diverse and international set of ideas and perspectives that will help the reader examine closely how Covid-19 has invaded social life and (re)shaped trauma and loss. It will be of interest to all scholars and students of death studies, biomedicine, and end of life care as well as those working in sociology, social work, medicine, social policy, cultural studies, anthropology, psychology, counselling and nursing more broadly.
