Can We Apply Design Thinking in Education?

One of the significant aims of education is to produce learners who are well informed, that is to say, learners should understand ideas that are important, useful, beautiful and powerful. Another is to create learners who have the appetite the appetite to think analytically and critically, to use what they know to enhance their own lives and also to contribute to their society, culture and civilization.

Critical Thinking and Education

Education in critical thinking offers an alternative to a drift toward postmodern relativism, by emphasizing that we can "distinguish between facts and opinions or personal feelings, judgments and inferences, inductive and deductive arguments, and the objective and subjective."
